

## TC-300 & 310 Combination Service/Dumper

### NEW OR IMPROVED FEATURES

- 10 Ga A-60 Galvanneal steel dump body
- Wiring Harness – Factory-provided wiring harness to facilitate electrical installation
- Cylinder & base frame primed & painted (black only) at factory – speeds installation
- Front area between body and cab now clear of safety prop & structure
- Flush mounted Stop, Tail, Turn, Backup lights, & License plate I.D now provided
- Relocated Safety Prop – still operates safely from outboard of body, but is not stored in 3” area between front of body & cab
- Tailgate coal chute option now available – Bail-operated guillotine door. Deletes single handle top-drop, and adds *Quick-Latch* lower pins release
- Shipping weight of body has been reduced to 2,300 lbs for TC-300, and 2,050 lbs for TC-310
- Standard mounting time estimate reduced to 15 hours, plus painting of cabinets and pan
- Mounting tabs provided for both 6 & 7 prong receptacles
- Optional height cabguards available
- *Quick-Latch* option available to release lower pins with single handle
- All-electric tailgate replacement salt spreader available

### Upgraded storage compartments:

- Storage cabinets manufactured of A-60 Galvanneal steel
- All holes and openings in storage cabinets made prior to chemical dip priming process
- Increased storage space in cabinets – now 64 cu ft in TC-300, and 57 cu ft in TC-310
- Rotary latches on cabinet doors
- Internal light guards protect rear flush mounted lights against damage
- Automotive quality bubble type seal on cabinet doors
- Heavier-made doors are 3/8” thicker than industry standard, have 18 Ga outer skin
